

Strategic Negotiation

Training & Coaching Programmes

Triple-A Strategy · Wes Jones, Principal

Who this is for:

Procurement, commercial, and supply chain teams who negotiate regularly but have not been trained formally. Also effective for cross-functional teams preparing for a specific high-value negotiation. Minimum effective group: 6. Maximum: 16.

The 1-Day Workshop covers the same core framework as the multi-module programmes — compressed for teams that need immediate application. It is also a common entry point before organisations commit to a full capability programme.

Programme 02

6-Module Strategic Negotiation Programme

Structured capability development — spaced for retention and real-world application between sessions.

€33,000

On-site or hybrid · 6 sessions · Spaced over 8–12 weeks ·

Up to 16 participants

The 6-Module Programme builds negotiation capability through spaced learning — each session introduces new concepts, then participants apply them between sessions in real negotiations. The result is genuine behavioural change, not just classroom knowledge.

“Many thanks for the great training. I truly appreciate the time you invested in understanding our business beforehand and your flexibility in adjusting the programme to our way of learning. Two colleagues reached out the same day to share that they had already deployed what they learned — the best testimony for a truly value-adding session.”
